

CRYSTAL[®]

Champion for Rubber-to-Metal Bonded Parts

The Crystal line of water-based mold release agents offers several highly effective products specifically designed for rubber-to-metal bonded parts.

SAVINGS REPORTED

- ▶ Crystal provided 40% more molding cycles and thereby reduced average annual mold release cost by \$15,000.
- ▶ Scrap rate was reduced by at least 50%. At \$4-5 per part, these savings amounted to \$30,000/year.
- ▶ Crystal reduced the amount of buildup accumulating on molds. Longer intervals between cleanings brought at least \$5,000 in annual savings.

Note: These are examples as reported by customers. Individual results will vary.

SELECTION GUIDE

Crystal offers a product for almost any rubber molding application and provides users with similar benefits.

Rubber-to-Metal Bonded Parts	Crystal SP Plus, 1510
Injection Molding	Sulphur- and Peroxide-cured elastomers
NR/SBR/EPDM	Crystal 1053,1270, SP Plus
Silicone/Fluorosilicone	Crystal 5000, 5940-PS, 5130-FS
Bromo/Chloro-butyl	Crystal 5480-Rx
Anti-Blocks	Crystal 2000, 2030

TYPICAL APPLICATIONS:

- Rubber-to-Metal Anti-Vibration Parts
- Gaskets, Seals and Closures
- Belts and Hoses
- Shoe Soles
- Sporting Goods
- Blood Vial Stoppers
- Electrical Components
- Flooring and Mats
- Milled Rubber Antiblock
